CUCITRICE CONVERTIBILE AD AGO RICURVO PER MOCASSINO TUBOLARE O A SACCHETTO
CURVED NEEDLE CONVERTIBLE SEWING MACHINE FOR REAL MOCCASIN OR CALIFORNIA

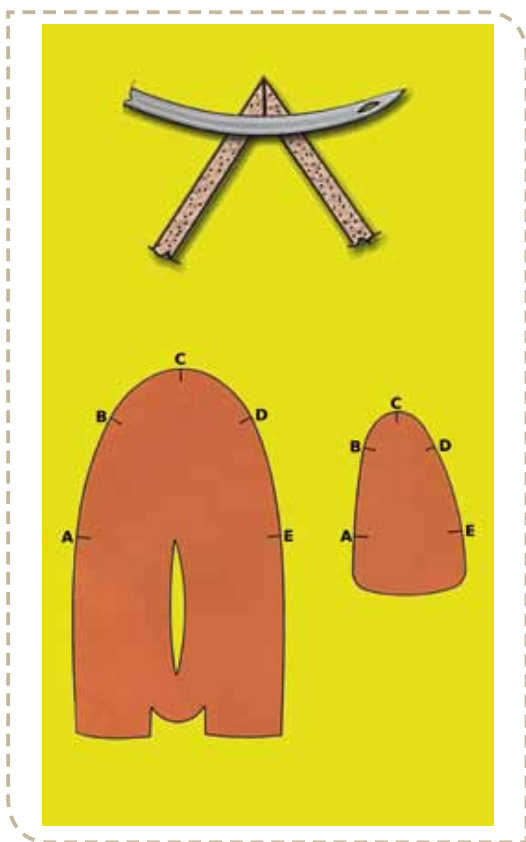

Il Modello **XM-747** è una macchina per la produzione di mocassini tubolari. La sua principale caratteristica è quella di cucire con ago ricurvo. Si ottiene in questo modo una cucitura simile a quella ottenuta cucendo il mocassino sulla forma con la lesina. Può eseguire cinque tipi di cucitura differenti (vedi schemi):

VELA con kit "S"
BORDO con kit "B"
CHICCO DI RISO con kit "C"
INTRACARNE con kit "U"
INVISIBILE con kit "I"

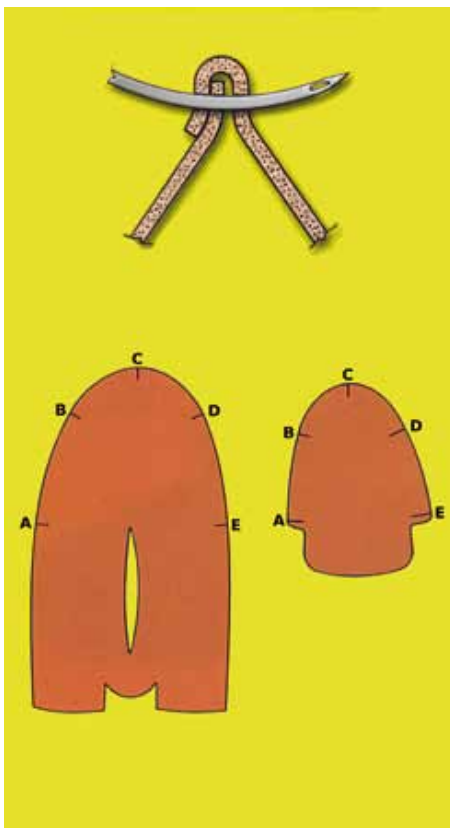

*Model **XM-747** is a machine for real moccasin production. Its main feature is the curved sewing needle. Thanks to this tool you can obtain the typical stitching pattern similar to the one achieved by seaming the moccasin on a last by using the shoemaker's awl. This machine can carry out five different stitching patterns (see diagram):*

***VELA** with kit "S"
BORDO with kit "B"
RICE GRAIN with kit "C"
INTER SIDE with kit "U"
INVISIBILE with kit "I"*
